BLACK WOMEN IN CONGRESS

Images Provided by: Google Images & Congressional Pictorial Directory

Congressional Office in Washington D.C.

Women in Congress historically account for a only a small fraction—about 2 percent—of the approximately 12,000 individuals who have served in the U.S. Congress since 1789, although recent trends suggest that the presence of women in Congress will continue to increase. Based on gains principally in the House of Representatives, each of the 13 Congresses since 1981 has had a record number of women Members.
